

Top 10 Reasons to use Tether

- 1** **Cost effective**
Tether uses your phone's existing data plan and requires only an affordable, one-time payment.
- 2** **Internet anywhere**
Tether uses a unique process to work around the connection limitations of the mobile browser, allowing you to get online anywhere a BlackBerry® call can be made.
- 3** **Fast connection speeds**
Tether offers internet speeds up to 2.4 mbps – as fast as any solution available.
- 4** **Quick setup**
Tether's software download process is simple and quick for both your smartphone and laptop and will have you surfing the web in a matter of minutes.
- 5** **Carrier agnostic**
Tether is seamlessly usable across all carriers, without the hassle of having to change settings.
- 6** **Bluetooth and USB**
Tether works via a USB cord, or can be configured to work wirelessly over Bluetooth.
- 7** **BlackBerry® friendly**
Tether is compatible with all BlackBerry® smartphones.
- 8** **Works on Windows and Mac**
The Tether software can support both PCs and Macs.
- 9** **Fully customizable**
Tether offers customizable options and carrier-branded solutions.
- 10** **Extremely secure**
Protected, carrier-side server options and configurable data management controls are available.
